

## Endoscope storage cabinet ProEndo Dry classic

### A norm-compliant storage cabinet for the inner and outer drying of endoscopes

The **ProEndo Dry classic** combines controlled ambient conditions for the storage of endoscopes with a drying function

- Compliant with DIN EN 16442
- Efficient system with a free hanging and completely extractable telescopic rack for the storage of endoscopes
- Storage of Endoscopes and Bronchoscopes (regardless of manufacturer)
- User and endoscope identification via RFID- and/or Barcode-Scanner
- Door lock
- 7" Touchscreen behind tempered glass
- Viewing window / Glass panel
- LED Status display
- Own air system generation or connection to a preexisting medical air connection
- Permanent overpressure in the chamber via dedicated independent ventilators
- Control of each individual air flow channel via a flowsensor per endoscope
- Air filtered via H13 when using own air system

Capacity	max. 4 Endoscopes per rack, modularly increasable
Techn. Data	230 V, 50 Hz
Drying	Medical air or own air system generation
Dimensions	WxDxH: 300 x 670 x 2350 mm
